Inspired by the social atmosphere of porno cinemas and in the tradition of cabaret, YANS & RETO is a one-night festival of action art by artists (mainly) over sixty and under thirty. The artists present themselves through short pieces, creating energetic, inter-generational encounters.

Youth is defined by stupidity and age by wisdom. If one characterizes stupidity by lack of self-control rather than by a lack of knowledge or ability, one finds that one doesn't grow intelligent but simply grows older. At the same time, being "progressive" is not related to being young but to being responsible. Although nobody would like to be perceived as stupid, being stupid releases one from being thoughtful and correcting mistakes.
